

Our Engineers Get Charged Up About Batteries

Discover how our broad range of services and battery-testing expertise keep you plugged in to testing requirements around the globe.

America

Choose certainty.
Add value.

Visit TÜV SÜD at booth #104 during AABC.

From single cell batteries to full EV packs, we are your global testing partner. Our experienced engineers are experts in developing innovative testing strategies to ensure your batteries are safe, reliable, and compliant.

You also benefit from the convenience of

working with one source that handles all your testing needs:

- Life Cycle
- Abuse
- Durability
- Performance

We can customize our tests to meet unique customer requirements, in addition to testing

and certifying to the following standards:

- SAE J 2464
- USABC
- ECE R100
- IEC 62133
- UL 2054
- IEC 62660
- UN 38.3
- UL 1642
